## PATENTED VARIETIES

Introduced by F. W. ANDERSON, Merced, California

ALMONDS: June Buds—On Lovell Root

5/16" up..... Price \$2.00 each

Not sold in less than 100 tree lots

**RUBY** — Blooms late within a day or two after Mission (Texas). Vigorous, productive tree. Interfertile with Nonpareil and Mission. Nut somewhat softer shell than Mission. 50% to 55% kernel crackout. Late bloom avoids some of the risks of rain and frost.

NECTARINES: June Buds—On Lovell Root

5/16" up	1-9	10-99	100 up
*Le Grand .....	\$3.00	\$2.75	\$2.50

# PEACH

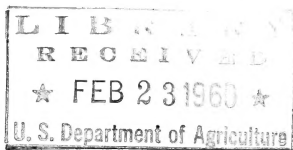

# EVE

*U.S. Plant Patent No. 1716*

# EVE

*U.S. Plant Patent No. 1716*

We anticipate a bright future for this new variety. It was discovered by Dareld R. Vestal, Red Bluff, California, as a mutation in his Red Haven orchard. The fruit has all the characteristics of the well known Red Haven, but with the exception that it ripens approximately 15 days in advance of Red Haven. Apparently an exceptional keeper and possibly somewhat larger in size than Red Haven. Not less than 150 trees sold.

## ROYAL MAY

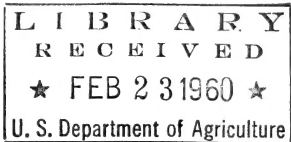

*U.S. Plant Patent No. 1516*

# ROYAL MAY

*U.S. Plant Patent No. 1516*

Originated by F. W. ANDERSON, Merced, California

Semi-freestone. Ripens approximately 8 weeks before Elberta. The skin is almost fuzzless, clear yellow in color, and almost completely covered with a rich red overlay at maturity. Flesh is yellow, firm in texture, with a slight acid flavor. Fruit is of good size. Tree is vigorous, producing well. Relatively few split pits. Not less than 300 trees sold.

**REGAL GRAND**

*U.S. Plant Patent No. 1751*

# REGAL GRAND

*U.S. Plant Patent No. 1751*

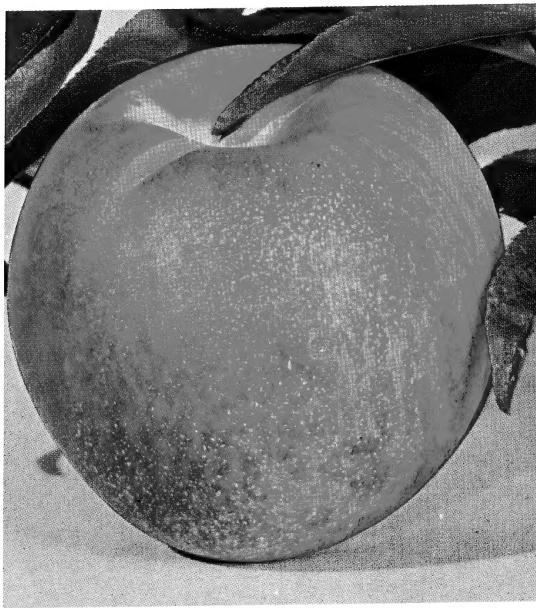

Originated by F. W. ANDERSON, Merced, California  
Clingstone. Ripens 1 week to 10 days  
after Late Le Grand. Size about equal  
to Le Grand. Skin is smooth, yellow in  
color, with a red blush. Flesh is of firm  
texture, yellow in color, with red at  
the pit. Regal Grand, with September  
Grand, extends the marketing season of  
Le Grand type nectarines approximately  
three weeks.

**SEPTEMBER GRAND**

*U.S. Plant Patent No. 1755*

# SEPTEMBER GRAND

*U.S. Plant Patent No. 1755*

Originated by F. W. ANDERSON, Merced, California  
Clingstone. Ripens approximately three  
weeks after Late Le Grand. Size about  
the same as Le Grand. The flesh is of  
firm texture, yellow in color, with red  
at the pit. Skin is yellow, with red blush.  
At present, the latest ripening of Le  
Grand type nectarines. Not less than 300  
trees sold.
